

Welch Allyn
Connex® Vital Signs Devices for Ambulatory Care

Helping you do more of what matters at the point of care

A lot happens at the *point of care*.

Triaging. Documenting. Examining. It's no wonder clinicians often struggle to make the most of their time with patients. That's why Welch Allyn Connex® vital signs devices are designed to help improve accuracy, efficiency, outcomes and reliability across care settings.

Solutions Designed for Your Ambulatory Care Setting

Physician office

Community health center

Ambulatory surgery center

Connex® Spot Monitor

All-in-one vital signs device ideal for spot checking

Connex® Vital Signs Monitor

Upgradeable for continuous monitoring

Connex® Integrated Wall System

Complete, integrated physical exam solution

ACCURACY MATTERS.

Welch Allyn Connex vital signs devices provide decision support with industry-leading parameters that help ensure clinical accuracy across patient populations.

Blood Pressure

SureBP® technology measures blood pressure on inflation in as little as 15 seconds. Plus, automated blood pressure averaging has been shown to help reduce hypertension misdiagnoses.¹

Thermometry

SureTemp® Plus and Braun thermometry options are known for accurate readings across patient populations.

Pulse Oximetry

Devices support a variety of leading SpO₂ technologies: Masimo®, Nellcor® or Nonin®.

EFFICIENCY MATTERS.

Every second with a patient counts.

With Welch Allyn Connex devices, you can take a full set of vitals in under a minute.² Plus, Welch Allyn partners with more than 150 EMRs to send data from the device directly to the patient's record. Choose between wired and wireless connectivity options to find the workflow that's right for your practice.

OUTCOMES MATTER.

Patient outcomes and related quality measures associated with MACRA and HEDIS are increasingly important to your practice's financial stability. Welch Allyn vital signs devices can help you **make an impact on the metrics that count.**

Case in point: Managing chronic conditions like hypertension

Welch Allyn Connex devices can help screen for and manage high blood pressure with quick, accurate blood pressure readings. Furthermore, automated blood pressure averaging can help you **improve hypertension diagnoses and prescribe appropriate treatments.**³

RELIABILITY MATTERS.

Welch Allyn Partners in CareSM service agreements can help minimize equipment downtime, keeping devices where your clinicians need them—at their fingertips.

Services include:

- Repair parts and labor
- Accessory protection
- Expedited service turnaround

- Loaner devices
- Annual device calibration

And more. Read about our full Partners in Care service offerings at www.welchallyn.com.

^{1, 3} Robert Smith, MD. Blood pressure averaging methodology: Decreasing the risk of misdiagnosing hypertension

² Estimate based on standard acquisition times for Welch Allyn sensors: Approximately 15 seconds for blood pressure, 4 to 7 seconds for temperature, and 8 to 12 seconds for SpO₂.

Choose the device that's right for you.
